

SPOTLIGHT ON THE PREMISE OF THE MONTH...

This month we have chosen...

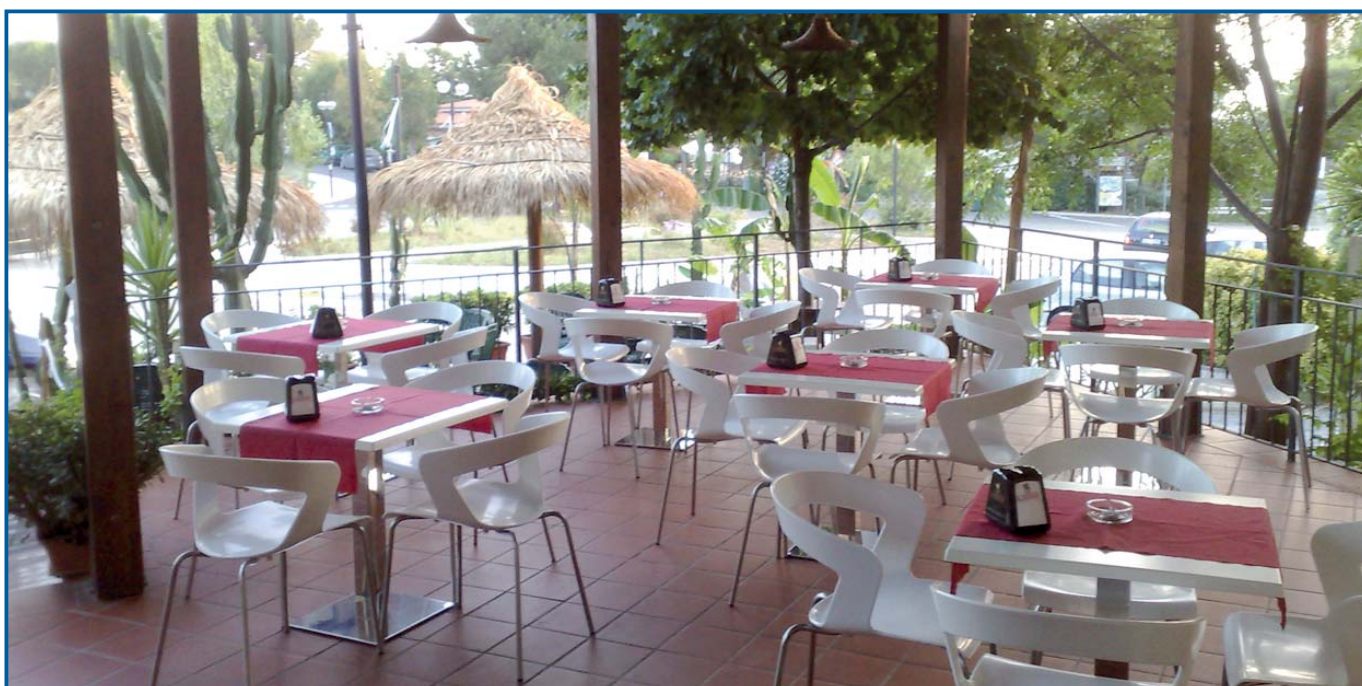

The Trendy Mosquito Sangineto (CS)

The town of Sangineto, a tourist resort on the Tyrrhenian coast of Calabria (province of Cosenza), has won the 2009 regional "championship" for the largest growth in number of visitors. That's a fine result if you consider the many pearls to be found in the land of hot peppers and Gennaro Gattuso. Actually, the award should be divided in two, just like Sangineto itself, of which the old town centre is up on a hill while the newer section (the Lido) lies along the coast. Close by the beach is the Castello del Principe (the Prince's Palace), a 15th century construction now functioning as the venue for an important film festival and housing a popular disco where the action goes on until late. The reasons of Sangineto's success are, of course, the beach and the beautiful sea, the pleasant climate and a limited number of those summer pests - mosquitoes. With one exception, that draws people young and old from all around: the **Mosquito** American Bar.

Located in the Lido's central piazza and almost entirely open-air, the Mosquito has quickly become "the place" for Sangineto and surroundings. Thanks to the skills and passion of the young owner-Angelo Rinaldi-the American bar is considered the reference point for breakfast, aperitif and for the best moments of the after disco-time: the 5 a.m. croissant.

SPOTLIGHT ON THE PREMISE OF THE MONTH... (cont.)

Contributing to the success of the Mosquito are no doubt the tables and seating supplied by **Metalmobil (INDUSTRIEIFI)** for the whole outdoor section. The Mosquito is an attractive café at first glance. Its atmospheres recall the timeless, laid-back mood of Puerto Escondido, mixed with a touch of Italian elegance. The café is open practically without interruption, from dawn to dawn. Accordingly, the furniture was chosen for appeal and personality, but also for its ability to withstand intensive use by young people. These reasons led to choosing **Ibis** seating and **XT** tables. The Ibis chairs (of which there are 40, all with a white body), designed by Francesco Geraci and also available with a sled base, are the best answer to the bar's requirements for attractiveness, sturdiness and handiness.

Practical, easy to clean and stackable, with slightly diverging frame and legs, Ibis even resembles the insect that gives the place its name, the mosquito.

The ten XT tables also contribute to the café's cheerful atmosphere. With their simple, modern design and sturdy build, a white Werzalit top on a stainless steel pedestal, the tables fit perfectly well in the setting.

Like any self-respecting member of the Culicidae family, the Mosquito hibernates in winter, to stir again with the first warm sun of the new year. But don't worry-this mosquito doesn't bite!

METALMOBIL for MOSQUITO

IBIS design Francesco Geraci

IBIS

Mosquito has chosen IBIS seating, art. 002, with shell in PP+PET (multilayer variable density man-made), colour white, and AISI 304 18/10 stainless steel frame.

SPECIAL FEATURES:

Practical, versatile and never out of place, the Ibis seating collection includes a stacking chair with 4-leg frame, a stacking chair with sled base, chair with a central column, office chair, a barstool and a swivel barstool. Designed for indoor and outdoor use, the items in the Ibis collection have bodies made of PP+PET (polypropylene + polyethylene terephthalate), a variable-density multilayer engineering composite, non-toxic and 100% recyclable, resistant to shocks, detergents, alcohol and UV radiation. Ibis is available in white, ivory, orange, pearl grey, yellow and in the new green and anthracite grey.

XT design Metalmobil Concept

XT

Mosquito has chosen XT tables, art. 479 Q, with bright stainless steel pedestal and 70x70 cm white Werzalit table top.

SPECIAL FEATURES:

The XT family of tables is characterised by its column and base-cover in polished and satined stainless steel. XT features a minimalist design especially planned to allow the maximum freedom of association of the table with different types of Metalmobil seating.
