

STEELMOBIL a Project Lebanon

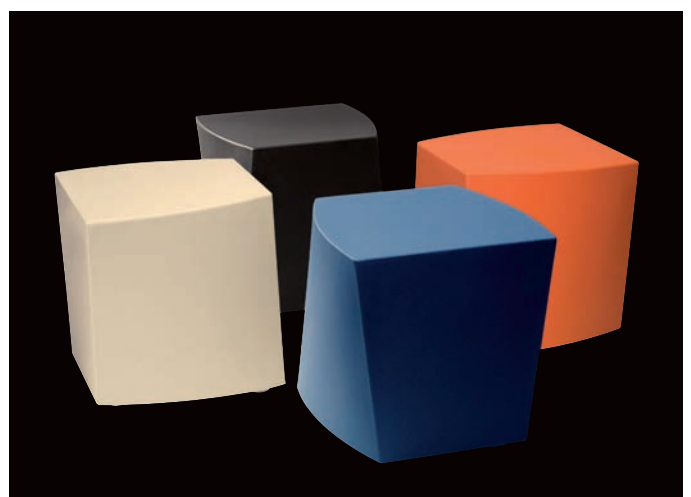

STEELMOBIL at Project Lebanon - Italian Pavilion.

From 16th to 19th JUNE, **STEELMOBIL** will be in Beirut, with our **POUF BOOM** in **PROJECT LEBANON**. We will be guests under the scope of the **ITALIAN MARBLE SHOW** organised by the National Foreign Trade Institute. Project Lebanon is the 14th International trade show for construction, materials and construction equipment technology for the Middle East.

BOOM - design Emilio Nanni

BOOM is a pouf stool with an original presence that adapts to all collective areas. BOOM is a collection of extremely versatile poufs that can meet all demands of individual and group seating solutions, with a decisively decorative effect given by the asymmetric cut of the faces of each square module. BOOM is available in rotationally moulded polyethylene for outdoor use, or in padded wood, upholstered in fabric, leather or eco-leather, for rooms indoors. BOOM can be used as an individual seat or, by placing several side-by-side, as a bench, with a high composite resonance. BOOM is supplied with closing stopper for ballasting.

COLORS	SPECIFIC CHARACTERISTICS:
Polyethylene: white, anthracite, orange, blue.	BOOM can be used as an individual seat or, by placing several side-by-side, as a bench, with a high composite resonance. Boom is supplied with closing stopper for ballasting.
